

## **JOB DESCRIPTION**

**POSITION TITLE:** Innovation and Media Specialist

**REQUIREMENTS:** Bachelor degree in education w/ 5 years experience, media center and/or maker space management preferred.

**REPORTS TO:** Lower School Principal and Director of Instructional Technology

### **RESPONSIBILITIES:**

The Lower School Innovation and Media Specialist is a dynamic, energetic educator with exemplary teaching skills, out-of-the-box ideas, technology savvy, and the ability to instill creativity and critical thinking in all learners.

The Lower School Innovation and Media Specialist will create and facilitate innovative instructional approaches and activities for classroom teachers to integrate technology into their weekly lessons through modeling and collaborative teaching.

The Lower School Innovation and Media Specialist will utilize the newly remodeled Media Center and Collaborative Learning Lab to inspire and develop critical and curious learners through student-led activities, inquiry-based instruction, maker space projects, and creative problem solving pulling from children's literature, classroom curriculums, and the world around them.

The Lower School Innovation and Media Specialist will instill the importance and value of digital citizenship and awareness through interactive and real world examples producing responsible and thoughtful 21st century learners.

The Lower School Innovation and Media Specialist will utilize the school's iPads and Macbooks to inspire students to become creators of content instead of consumers with digital storytelling, movie making, and multi-media projects.

The Lower School Innovation and Media Specialist will maintain and promote the school's library collection, the love of reading, and the exciting developments in children's literature through activities, weekly discussions, book previews, and more to spark students' curiosity and excitement for all things books!
